

Drying equipment for equestrian apparel

PODAB's drying cabinets offer the fastest, most space-efficient drying solution for your horse and rider wear, preserving both the function and lifespan of expensive garments. Stop waiting for wet apparel and save hours with this essential addition to your busy stable.

Typical
drying times
under 1 hour.

Fast, effective drying for busy stables

PODAB's ProLine TS63 E drying cabinets are specifically designed for equestrian apparel, ensuring a more productive yard and extending the lifespan of valuable rugs, tack, rider and horse clothing. The TS63 offers rapid, gentle inside-out drying, reducing wear and tear compared to traditional methods, whilst also providing a high-capacity yet space-efficient solution that preserves the durability and performance of critical equestrian equipment from horse blankets, and rider jackets to turnout rugs.

Since the 1990s, PODAB has been pioneering the industry with advanced drying cabinets, revolutionising the drying process for heavy-duty garments. Our innovative hangers enable inside-out drying, while an advanced internal hot air distribution system ensures thorough drying on both the inside and outside. This groundbreaking approach maximises efficiency and care, maintaining the integrity of all your expensive equestrian wear.

At the core of our dedication is the ProLine TS63, which offers tailored drying programs designed specifically for equestrian kit. By combining precision engineering with cutting-edge drying techniques, we enhance the rider experience and protect long-term investments in their saddle pads and bridles.

"ProLine TS63 was designed with intensive research, experienced engineers, and innovative solutions to create a more efficient and productive yard." - Head of Engineering and Design

Save energy.
Only 3 kWh
per session.

Rapid drying solution, saving hours of waiting

Experience a groundbreaking shift in efficiency with drying times averaging under one hour for most wet items. Get essential apparel, saddle blankets, and boots back in rotation immediately, eliminating costly downtime between rides or shifts. The TS63 E cabinet allows your team or riders to access dry kit faster than ever before, ensuring you maximise use and productivity every single day.

Gentle drying technology

Utilising a gentle drying process without mechanical action, making it perfect for delicate or hard to dry garments or accessories that should not be tumble dried. Eliminate any concerns regarding damaging your fabrics – the TS63 E drying cabinet offers a safe and effective alternative.

Optimal energy efficiency

The ProLine TS63 E is exceptionally energy-efficient, helping to reduce both costs and environmental impact. With energy usage of approx 3 kWh per session it's innovative design ensures optimal performance while minimising energy consumption, making it a sustainable choice for any equestrian operation.

Purpose-built design for your equestrian wear

Heavy and hard-to-dry garments with padding and membranes dry efficiently thanks to the unique hanger design that directs warm air into the textiles. The cabinet can dry any wet apparel from saddle pads, bandages and rugs to boots, head collars, jackets and girths.

Highly space-efficient with a minimal footprint

The TS63 E offers high-volume drying capacity within a footprint of just 0.768 m². Unlike giant, clunky rug racks or inefficient, sprawling heat rails that consume floor space and create clutter, this vertical cabinet centralises your drying. Streamline your drying room or tack area, reduce obstructions, and maximise the usable space in your stable whilst accelerating drying times.

Versatile drying options

A flexible drying cabinet that accommodates both rider wear and accessories. Internal storage enables efficient, gentle drying of all gear, regardless of shape or material. The cabinet is also perfect for safely drying items that cannot be hung, such as leather boots and helmets.

We offer the market's most **advanced technology** for fast, space efficient drying of equestrian apparel

Flexible interior solutions for efficient and gentle drying of garments
